Rawline Collection by

ege[®]

THE URGE TO EXPLORE SPACE

The designers

Helle Lykke Jensen. Born 1963. Louise S e Oxlund. Born 1978. Both designers have a degree in product design and have worked with textiles and fabrics before joining ege carpets. Their fashion experience combined with their extensive and in-depth knowledge of carpet design have been the foundation for the development of the Scala collection.

The collection

Beautiful patterns, woven materials, refined craftsmanship, interesting textures and outstanding durability. The Scala collection is a unique carpet solution combining the minimalistic, but artisan texture of a flat woven construction with different patterns of various scale. The collection offers a basic rawness while still bringing the acoustic and practical advantages of carpet to the interior design.

With a distinct touch and quality of material, the Scala collection features three design stories celebrating well-known textiles used by fashion and different cultures throughout the years. The design stories – Minimal, Reflex and Heritage – hold patterns with three levels of expression from small, medium to large making

room for subtle as well as more striking and artistic patterns that can stand alone or be mixed together.

All the Scala patterns have their own individual sense relating to the fabric's texture and weaving details that reinforce the expression. The basic and linear look of denim. The classic stitch of a gentleman's suit. The folded and pleated fabrics with interesting reflections of light and dark. The melange patterns that offer a soft, practical touch. The beautiful worn, vintage textiles with a unique story and beautiful play of colours.

Available as broadloom, tiles and Figura. Partly made of regenerated ECONYL® yarns from used fishing nets, Scala is a truly green choice.

Broadloom

Roll out a continuous surface with an unbroken plane of colour and texture that will make the most beautiful display of any of the Scala patterns. Comes in 4 metres width. The woven textile backing offers great acoustical and comfort properties.

Tiles

The Scala patterns can take on a completely new design expression when used as carpet tiles. A personal and aesthetic variation that offers great functionality and flexibility in dynamic interior environments. The patented Ecotrust felt backing is produced from used PET water bottles and offers great acoustical and comfort properties.

Figura

Push your floor design into a new direction with the choice of six creative and playful shapes. Turn the Scala collection into fascinating and one-of-a-kind flooring with shape, colour and pattern in your hands. Try powerful contrasts or subtle, refined combinations. All Figura shapes come with the patented Ecotrust felt backing that is also used for carpet tiles.

The Scala design stories have three different levels of expression ranging from small, medium to large. Mix subtle designs with artistic patterns from the Scala collection or combine the Scala designs with other ege collec-

tions and constructions. Find inspiration in the creative combinations to define areas, guide people and because it creates functional flooring that will bring beauty and life to any interior design.

All the details

Technical specifications

Scala features three design stories with patterns ranging from small, medium to large developed in one of ege's standard colour palettes K5295. Available as broadloom, carpet tiles and Figura, the collection takes on different expressions with the same pattern. Mix Scala patterns or combine them with other ege collections to get a truly unique flooring solution for not only one room but for projects with several spaces. The flat woven construction combined with the beautiful patterns creates a new dimension to modern flooring while still delivering the practical, comfort and acoustical benefits of carpets to the interior design.

- 11 designs
- 5 colours
- Broadloom, tiles and Figura
- 1 standard quality (see specifications on page 63)
- No minimum order requirements for broadloom
- Minimum order from 40 m² for 48x48 cm and 96x96 cm tiles
- Minimum order from 40 m² per colour/shape/quality for Figura
- Specials are available but will require trial run
- Undisputed performance standard EN 1307
- Performance classification to fit any need; heavy use
- 24-hour sample service
- Dispatch within 3 weeks from receipt of order

Scala is the green choice

From fishing nets to textile floorings

Fishing nets account for one tenth of the waste in the ocean and can drift for months or years and be a threat to sea life. At ege carpets we use Aquafil's ECONYL® yarns produced from used fishing nets. Once

the nets are collected and cleaned, they are physically and chemically broken down and reborn as strong yarns for carpets. The yarns are both regenerated and regenerable.

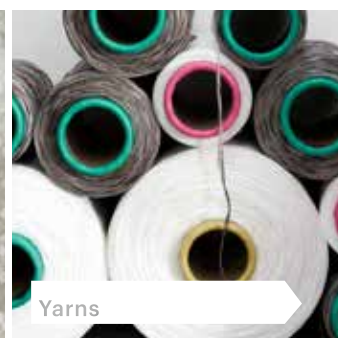

ECONYL®

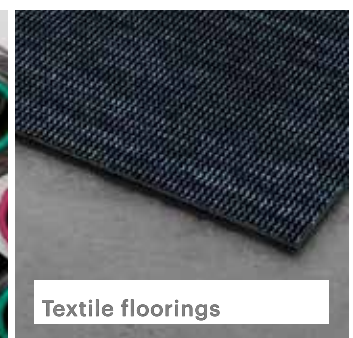

Fishing nets

Chips

Yarns

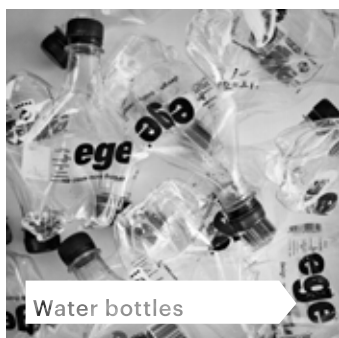

Textile floorings

We turn bottles into tile backings

Scala tiles have the patented Ecotrust felt backings that are also Cradle to Cradle Certified™. An innovative production technique turns used water bottles into a soft, yet strong and highly durable PET felt

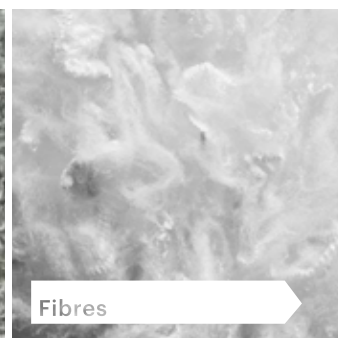

that also holds great acoustic performance. PET felt is both recycled and regenerable.
