The designer

Karen Nybo. Born in 1975. Holds a degree in textile design from Design School Kolding in Denmark. Karen has developed several ege collections and worked with architects and interior designers on countless design projects around the world.

The collection

Looking from far above, earth [in Latin: terra] brings us a spectacular view where wild forests transform to a palette of greens blending into an abstract, organic shaped motive. Roaring oceans meet in dramatic and extremely powerful bluish points of intersection with light foam tops. The dry desert mixes light and dark shades of orange, red and brown when the tiny grains of sand move with the wind.

This is exactly the inspiration for the Terra collection. Hovering in the sky, Terra is an aerial odyssey across continents, oceans,

savannahs, deserts, mountains and lakes with striking colours and subtle blends representing the diverse colour palette of landscapes around the world. The multi-level loop structure adds a new perspective to the design as well as a texture and depth to the result.

Available in nine colours and as broadloom, tiles and Figura, Terra is made of ECONYL® yarns produced from used fishing nets. The yarns are both regenerated and regenerable, making Terra a truly green choice for your next flooring project.

Same design, different qualities

If you have fallen in love with the Terra design, but are looking for a different quality due to taste, specifications or budget, you can have the beautiful Terra design in other constructions that

will fit your needs. You can choose between nine different High-line qualities, tufted or loop pile and without the multi-level loop structure that characterizes the standard Terra collection.

SUSTAINABLE CARPET DESIGN BY EGE

Rethink the essential

GREEN ALL THE WAY THROUGH

Terra is Cradle to Cradle Certified™

We turn a bottle into a tile backing

A water bottle contains a vital resource for our wellbeing. But did you know that the bottle itself has lots of applications and that we have managed to utilise one of them by recycling used water bottles into a patented Ecotrust felt backing for carpet tiles?

An innovative production technique turns bottles into a soft yet strong PET felt material that is long lasting and has great acoustic performance. PET felt is both recycled and regenerable.

From regenerated fishing nets to tile faces

Fishing nets account for one tenth of the waste in the ocean. Abandoned fishing nets can drift for months or years and be a threat to sea life. At ege carpets we use Aquafil's ECONYL® yarns produced from used fishing

nets. Once the fishing nets are collected and cleaned, they are physically and chemically broken down and reborn as strong and hardwearing yarns for carpets. The yarns are both regenerated and regenerable.

ENVIRONMENTAL FRONTRUNNER

In 2015, ege carpets was awarded the prestigious National Pioneer Certificate by The European Commission for being one of the first Danish companies to register with EMAS in 1996.

Environmental responsibility lies deep in our hearts, and we are environmentally conscious all the way through. That is why both the face and the backing of our carpet tiles are produced from recycled or regenerated materials. However, we are not only green in the product itself – but also in our sustainable and innovative production processes.

When a company wishes to make a difference in the environmental sphere, it is important to take the lead and do things that other companies do not. We are still the only EMAS certified carpet manufacturer in the world. EMAS certification sets higher requirements every single year ensuring that our environmental initiatives continuously improve. Since 2007, thanks to EMAS, we have, for example:

- reduced our CO²-emissions with 48% and aim at reducing it by 50% before 2020
- increased the number of Cradle to Cradle Certified™ products to 40 and aim at increasing this further in the future
- increased the renewable energy purchase to 88% and aim at buying all our electricity exclusively from renewable resources by 2020

WE LOVE PEOPLE

Carpets are our products, but people are our primary raw material. We have a clear, value-driven focus on CSR. ege carpets is a workplace at which health and safety are always prioritised. We are opposed to discrimination and we work to create equal opportunities for everyone, both inside our company and externally. We are engaged in the local communities, where we manufacture our products – we seek to be a responsible company, which provides jobs and growth. Our work with CSR covers a wide range of areas. First and foremost, however, CSR is about respect and responsibility. Respect is something you give. Responsibility is something you take.

OUR STORY

Environmental issues are not just about things looking good on paper. We are also concerned about tomorrow and the Earth's resources. It involves people and ethics, as well as the big – and the small – questions. When every company starts to think this way, things will really begin to change.

As a responsible manufacturer, we are of course subject to business management regulations. However, we regard certification as an opportunity to go beyond legal requirements, regulations and obligations and achieve a higher level. We do our utmost to meet our own ambitions to improve sustainability within the company. By also qualifying for a large number of certifications, we wish to be a role model – and thus ensure that we are always at the leading edge of the carpet industry. CSR standard DS 49001 is an excellent example. We are the only carpet manufacturer in the world to have been awarded this certificate. When it comes to CSR, we are striving to become the world's leading carpet manufacturer.

Technical specifications

Terra features one design in nine beautiful colours. Available as broadloom, tiles and Figura, the collection can take on very different expressions.

The multi-level loop structure made from ECONYL® yarns creates a new dimension to the design adding depth and texture to the carpet while still delivering outstanding quality as well as great comfort and acoustic benefits.

- Nine colours
- Multi-level loop structure
- Broadloom, tiles and Figura
- Undisputed performance standard EN1307
- Performance classification to fit any need: heavy and extra heavy use
- 24-hour sample service
- Dispatch within 2 weeks from receipt of order
