CLIENT	Egetaepper a/s	

	ASTM E662 Smoke Density (Flaming) Standard Test Method for Specific
TEST METHOD CONDUCTED	Optical Density of Smoke Generated by Solid Materials also referenced
	as NFPA 258

	DESCRIPTION OF TEST SAMPLE	
IDENTIFICATION	Graphic Wool 1100 LWT	
CONSTRUCTION	Cut Pile	
BACKING	Attached Cushion	

GENERAL PRINCIPLE

This procedure is designed to measure the specific optical density of smoke generated by the test specimen within a closed chamber. Each specimen is exposed to an electrically heated radiant-energy source positioned to provide a constant irradiance level of 2.5 watts/square cm on the specimen surface. Measurements are recorded through a photometric system employing a vertical beam of light and a photo detector positioned to detect the attenuation of light transmittance caused by smoke accumulation within the chamber. The light transmittance measurements are used to calculate specific optical density, a quantitative value which can be factored to estimate the smoke potential of materials. Two burning conditions can be simulated by the test apparatus. The radiant heating in the absence of ignition is referred to as the Non-Flaming Mode. A flaming combustion in the presence of supporting radiation constitutes the Flaming Mode.

	CON	IDITIONS	
PREDRYING OF TEST SAMPLE CONDITIONING OF TEST SAMPLE TESTING CONDITION	24 Hours at 140° F 24 Hours at 70° F As Received	and 50% Relative Humidity	
FURNACE VOLTAGE CHAMBER TEMPERATURE TEST MODE	118 V 95° F Flaming	IRRADIANCE CHAMBER PRESSURE	2.5 watts/sq cm 3" H ₂ O

AVERAGE MAXIMUM DENSITY CORRECTS	D (Dmc)	FLAMING	384
AVERAGE SPECIFIC OPTICAL DENSITY AT 4.0 MINUTES			279
	Specimen 1	Specimen 2	Specimen 3
Maximum Density (Dm)	380.0	409.0	379.0
Time to Dm (minutes)	7.0	8.0	7.5
Clear Beam (Dc)	5.0	6.0	4.0
Corr. Max Density (Dmc)	375.0	403.0	375.0
Density at 1.5 minutes	1.0	0.0	1.0
Density at 4.0 minutes	268.0	294.0	275.0
Time to 90% Dm (minutes)	5.0	5.5	5.0
Specimen Weight (grams)	10.3	10.6	10.6

APPROVED BY:

This facility is accredited by the Netional Voluntary Leboratory Accreditation Program for the specific scope of accreditation under Leb Code 100297. This accreditation does not constitute an endorsement, certification, or approval by NIST or any agency of the United States Government for the productitested. This report is provided for the exclusive use of the client to whom it is addressed it may be used in its entirety to gain product acceptance from duly constituted authorities. This report applies only to those samples testedand is not necessarily indicative of appearantly identical or similar products. This report, or the name of Professional Testing Laboratory, Inc. shall not be used under any circumstance in advertising to the general public.
