

Certified Technology

for the Healthcare Industry

Proven Performance in Antibacterial Carpets

All ege's healthcare products are treated with the certified ÆGIS Microbe Shields Technology to ensure, that bacteria - including **MRSA** - cannot survive. The ÆGIS Microbe Shields Technology is an anti-bacterial technology, which is tested and afterwards certified by the American producers ÆGIS Environment. In a new test the results shows that the treatment of the ÆGIS Microbe Shields Technology destroyed 99,99 % of the total population of bacteria within 24 hours. Therefore ege carpet can guarantee that all of it's carpets treated for the healthcare industry have anti-bacterial.

Certified Technology.
